## INTRODUCTION

WHITE RHINO INTEGRATED SERVICES LIMITED is a private limited liability company incorporated in Nigeria as a complete technical service provider. Our services range from the Oil & Gas Sector to Industrial support services.

WHITE RHINO INTEGRATED SERVICES LIMITED has excelled in its services to her clients in key specialized areas e.g. Engineering, Procurement, Construction, Fabrication, Logistics, Installation, Commissioning/Start-up and Production Facilities for Onshore and Offshore Oil fields.

Our growth and strength are based on a pool of technical staff brought together from different existing top-range companies to enhance our productivity. We are set to deliver any project within the clients' specified schedule. We provide our services on both a Lump-sum and Call-off basis. Our approach is project-driven, with an emphasis on finding viable solutions even in complex marginal situations. We share our clients' commitment by offering an end result free of surprises and producing competitively-best quality and value. We are thus well positioned to respond to the needs of our customers, and driven by the desire to deliver high quality and technical expertise in all our services.

## OUR CLIENTS

**ExxonMobil**

**subsea 7**

**SIEMENS**

**Salpem**

**Schlumberger**

**SEVEN ENERGY**

**OneSubsea**  
A Cameron & Schlumberger Company

## OUR CORE VALUES.

### **Time Management**

Measure this by setting objectives and targets consistent with the aims of this policy.

### **Report**

Routinely monitor and report HSE performance to the Board of Directors.

### **Awareness**

Ensure personnel are aware of their delegated HSE responsibilities.

## OUR VISION

To be a best-in-class indigenous company with requisite capabilities to consistently deliver services and project excellence to its clients

## OUR MISSION

To be the leading Engineering, Procurement, Construction and Maintenance company of choice in Nigeria and Sub-Sahara Africa operating on land, swamp and offshore locations.

# What we do.

6. Pipeline Construction, Fabrication, Repair and Steel Structural Works
7. Corrosion Control
8. Long-Range Ultrasonic Testing (LRUT)
9. Equipment Leasing/ Logistics
10. Procurement/ Supply
11. Asset Management
12. Procurement of Valve, Servicing and Maintenance
13. Mechanical Workshop
14. Horse, Coupling and Accessories
15. Vessel Support Services
16. Manpower Supply
17. Civil Construction
18. Gre Piping
19. Hot- Tap
20. Pipeline Cleaning, Gauging and Descaling

## **PIPELINE CONSTRUCTION, FABRICATION, REPAIR AND STEEL STRUCTURAL WORKS**

We parade new technology and best experienced personnel with technical experience that is second to none globally

We have capabilities to carry out EPCIC on land, swamp and offshore using manual and automatic methods.

We equally focus on restoring integrity to our clients' assets through emergency pipeline repair works like,

- Clamping
- Sleeving
- Sectional replacement,
- Composite wrapping etc.
- Structural Steel erection including foundation, erecting, torquing and grouting

## **CORROSION CONTROL**

Our well trained painting crews consist of highly experienced personnel that can be deployed to your onshore and offshore facilities. Our applications include but are not limited to fabricated steel structures, fabricated pipes and fittings, pipelines, storage tanks, oil platforms, flow stations, and gas plants. We have experienced IRATA Certified Painters and Blasters to safely access difficult locations. We also have NACE and IRATA Certified Painting Inspectors to guarantee the integrity of the painting jobs. We make sure that the paint manufacturer's instructions are followed, the surfaces are well prepared and the paints are applied to client and internationally accepted specifications using highly qualified and motivated team.

Our procurement team provides sourcing, expediting and logistics support for all types of paint and additives from any part of the world to achieve successful painting campaigns.

## **LONG-RANGE ULTRASONIC TESTING (LRUT)**

LRUT is an advanced Non- Destructive Testing. It is one of our fast inspection tools for carrying out pipeline survey for corrosion and other degradation using ultrasonic guided waves.

- We use these computerised tools to detect metal loss in the pipeline.
- We have one of the world's best engineers.

## Equipment Leasing/Logistics

- We offer logistics services on marine and earth moving equipment,
- We support our clients to transport their Materials from point of purchase to point of use.
- We provide logistics for our clients' field personnel
- VIP and Executives vehicle supply

## PROCUREMENT/SUPPLY

We help our clients to procure quality and safe materials directly from OEMs.

We maintain good business relationship with some OEMs for long lead items like;

- Electrical and Instrumentation Item,
- Piping and Mechanical Items.
- Security accessories.
- Engineering materials
- Consumables
- Safety items (PPE, tools & fire equipment)
- Supply of onshore/ offshore consumables

## **ASSET MANAGEMENT**

We have expertise in repair, maintenance, upgrade and construction of oil and non-oil facilities. Our capabilities cover

- Swamp and land
- Gas Plant and Injection
- Storage Tanks and Pressure
- Metering stations and pump houses
- Manufacturing industry
- Chemical plant/Fire water

Our facilities maintenance services include routine, turnaround, predictive and preventive maintenance on plant/equipment etc.

## PROCUREMENT OF VALVE, SERVICING AND MAINTENANCE

- We offer a comprehensive range of services on valves.
- We service and maintain valves to ensure they run effectively.
- Our maintenance cabin is equipped with tools, expertise and flexibility to ensure that your valves are maintained safely, effectively and promptly.
- Our expertise covers for both online and offline valve servicing.
- We supply all ranges of valves, flanges.

## **MECHANICAL WORKSHOP**

Our workshop is equipped with API standard machine like

- Cutting Machine
- Lathe Machine
- Drilling Machine
- Hydraulic Jack

for mechanical works, technology works and turning operations.

Our workshop also equipped with Bay for fitting and welding.

## HOSE, COUPLING AND ACCESSORIES

We offer and also couple

- Hoses
- Tubings
- Fittings

Our coupling are for threaded, mated angles and o-rings.

Our standard covers for API

## **VESSEL SUPPORT SERVICES**

We handle offshore vessel support services for

- Seismic survey ship
- Platform supply vessel
- Anchor Handling Tug Vessel
- Construction support vessel
- Diving support vessel
- Inspection maintenance and repair vessels
- ROV support vessels

## MANPOWER SUPPLY

We also provide complete manpower supplies for

- Electrical
- Marine
- Office Staff
- Mechanical
- HSE
- Quality
- Information technology
- Logistics
- Civil Construction etc.

## CIVIL CONSTRUCTION

We rehabilitate and upgrade existing civil structures. We have equipment, experienced and qualified personnel to execute

- Bush clearing/access creation
- Trust-boring,
- Foundation works for storage Tanks, pressure vessels, compressor, electric/power equipment, pipe support etc.
- HDD - Horizontal Directional Drilling
- Line-pipe concrete wall coating.

## GRE PIPING

Glass Reinforced Epoxy (GRE) materials are an alternative to carbon steel pipes which are highly useful especially for corrosive, aggressive and normal environments.

High strength fiber glass and amine cured epoxy resin processed under discontinuous filament winding mechanism is the technology used in GRE pipes. We offer both onshore and offshore GRE piping for hydrocarbon and waterline. We can offer GRE pipe for medium of temperature up to 110 ° C. Diameters of pipe produced range from 25mm to 2000mm.

## HOT-TAP

We provide Hot-tap services on;

- Oil lines
- Gas line
- Water lines
- Wastewater line

Our tools and equipment capabilities range from up-to 48" (1200mm) diameter with operating pressure up-to 2,000psig with operating temperature of 300deg. c

## **PIPELINE CLEANING, GAUGING AND DESCALING**

We assist facility owners with most-cost effective tools that will keep their pipelines clean for;

- Optimise flows
- Reduce corrosion
- Minimise dirt
- Remove paraffin
- Clean debris
